SPECTRA

PROBLEM STATEMENT

- Many individuals (elderly, visually impaired, recovering patients, and those needing temporary mobility support) struggle to find safe and reliable walking assistance.
- Lack of verified, trustworthy walking companions for outdoor mobility, daily errands, and wellness walks.
- Existing mobility solutions focus on transportation, not assisted walking or companionship-based movement.
- Users face safety concerns, limited accessibility support, and no real-time monitoring during walks.
- No unified digital platform offering:
 - i) Trained & verified Walkers
 - ii) Scheduled and on-demand walk bookings
 - iii) Live GPS tracking & emergency SOS support
 - iv) Transparent pricing & secure interactions

SOLUTION

- A multi-user mobile platform connecting **Wanderers** (users needing walking assistance) with trained, verified **Walkers**.
- Provides real-time, **safe**, and customizable walking companion services for mobility, errands, and wellness walks.
- End-to-end system including :
 - i) User onboarding & verification
 - ii) Walker approval & background checks
 - iii) Walk booking & scheduling
 - iv) **Live GPS tracking** & safety features
 - v) In-app payments & transparent fare calculation
 - vi) **Admin** monitoring & reporting
- Ensures **verified profiles**, trust-building, and secure, reliable walking experiences.
- Enhances independence, confidence, and social interaction, promoting physical and mental well-being.

TECHNOLOGIES USED & WHY

Frontend : React Native + Expo

- Cross-platform development with a single codebase.
- Fast prototyping and native performance.
- Expo simplifies deployment, camera, location, and permissions.

Backend : Firebase

- Auth: Secure, scalable authentication for multiple user types.
- Firestore: Real-time NoSQL database for bookings, profiles, analytics.
- Realtime Database: Used for live GPS tracking during walks.
- Reliable, serverless architecture → no backend maintenance.

Maps & Location : Mapbox

- Smooth map rendering, location tracking, and route visualization.

State Management : React Context API

- Lightweight, avoids Redux boilerplate.
- Perfect for global auth and booking states.

UI : React Native Paper + TypeScript

- Consistent material design components.
- Type safety for predictable, bug-free development.

WORKING OF THE APP

1. Onboarding

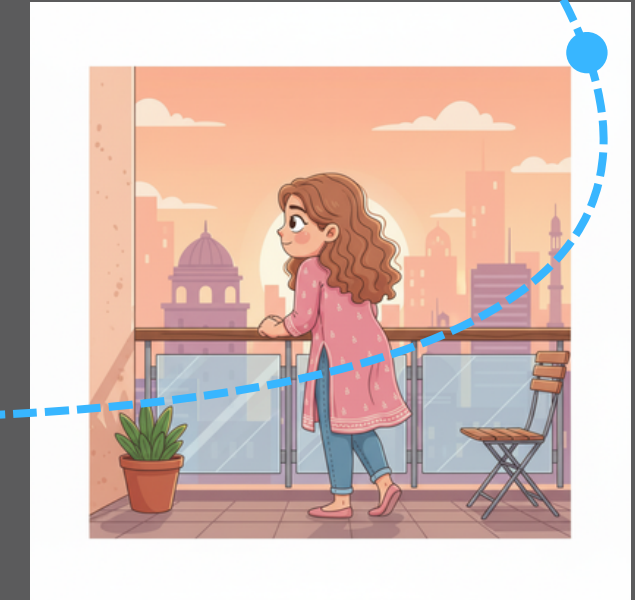

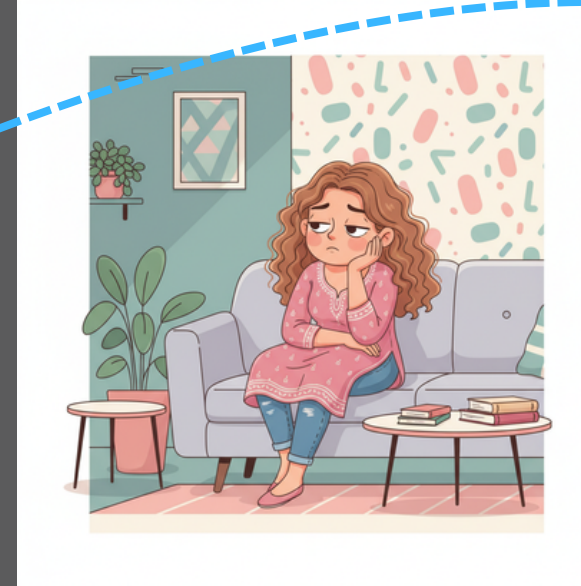

- Wanderer: Simple email signup → Home screen.
- Walker: Detailed profile + ID verification + Qualification Quiz → Admin approval.

2. Booking a Walk

- Wanderer selects walk type.
- Schedule date/time, speed, purpose, language, pickup/drop location.
- Sends request to preferred Walker.

3. Walker Matching

- Walkers receive real-time notifications.
- Accept/Reject requests instantly.
- Wanderer receives live status updates.

WORKING OF THE APP

4. During the Walk

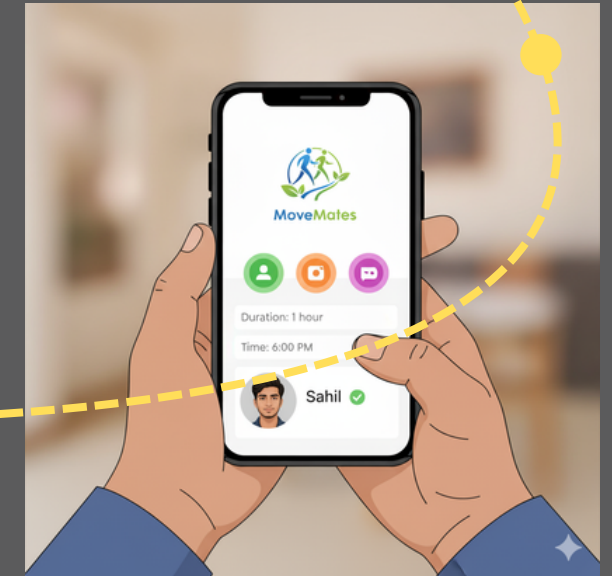

- Live GPS tracking on map.
- Real-time distance, ETA, route visualization.
- In-app chat + safety features like location sharing.
- Emergency SOS button

5. Payment Flow

- QR scan or cash payment.
- Fare calculation auto-generated.
- Walker earnings processed monthly with commission logic.
- Wanderers can Tip the Walker and give ratings

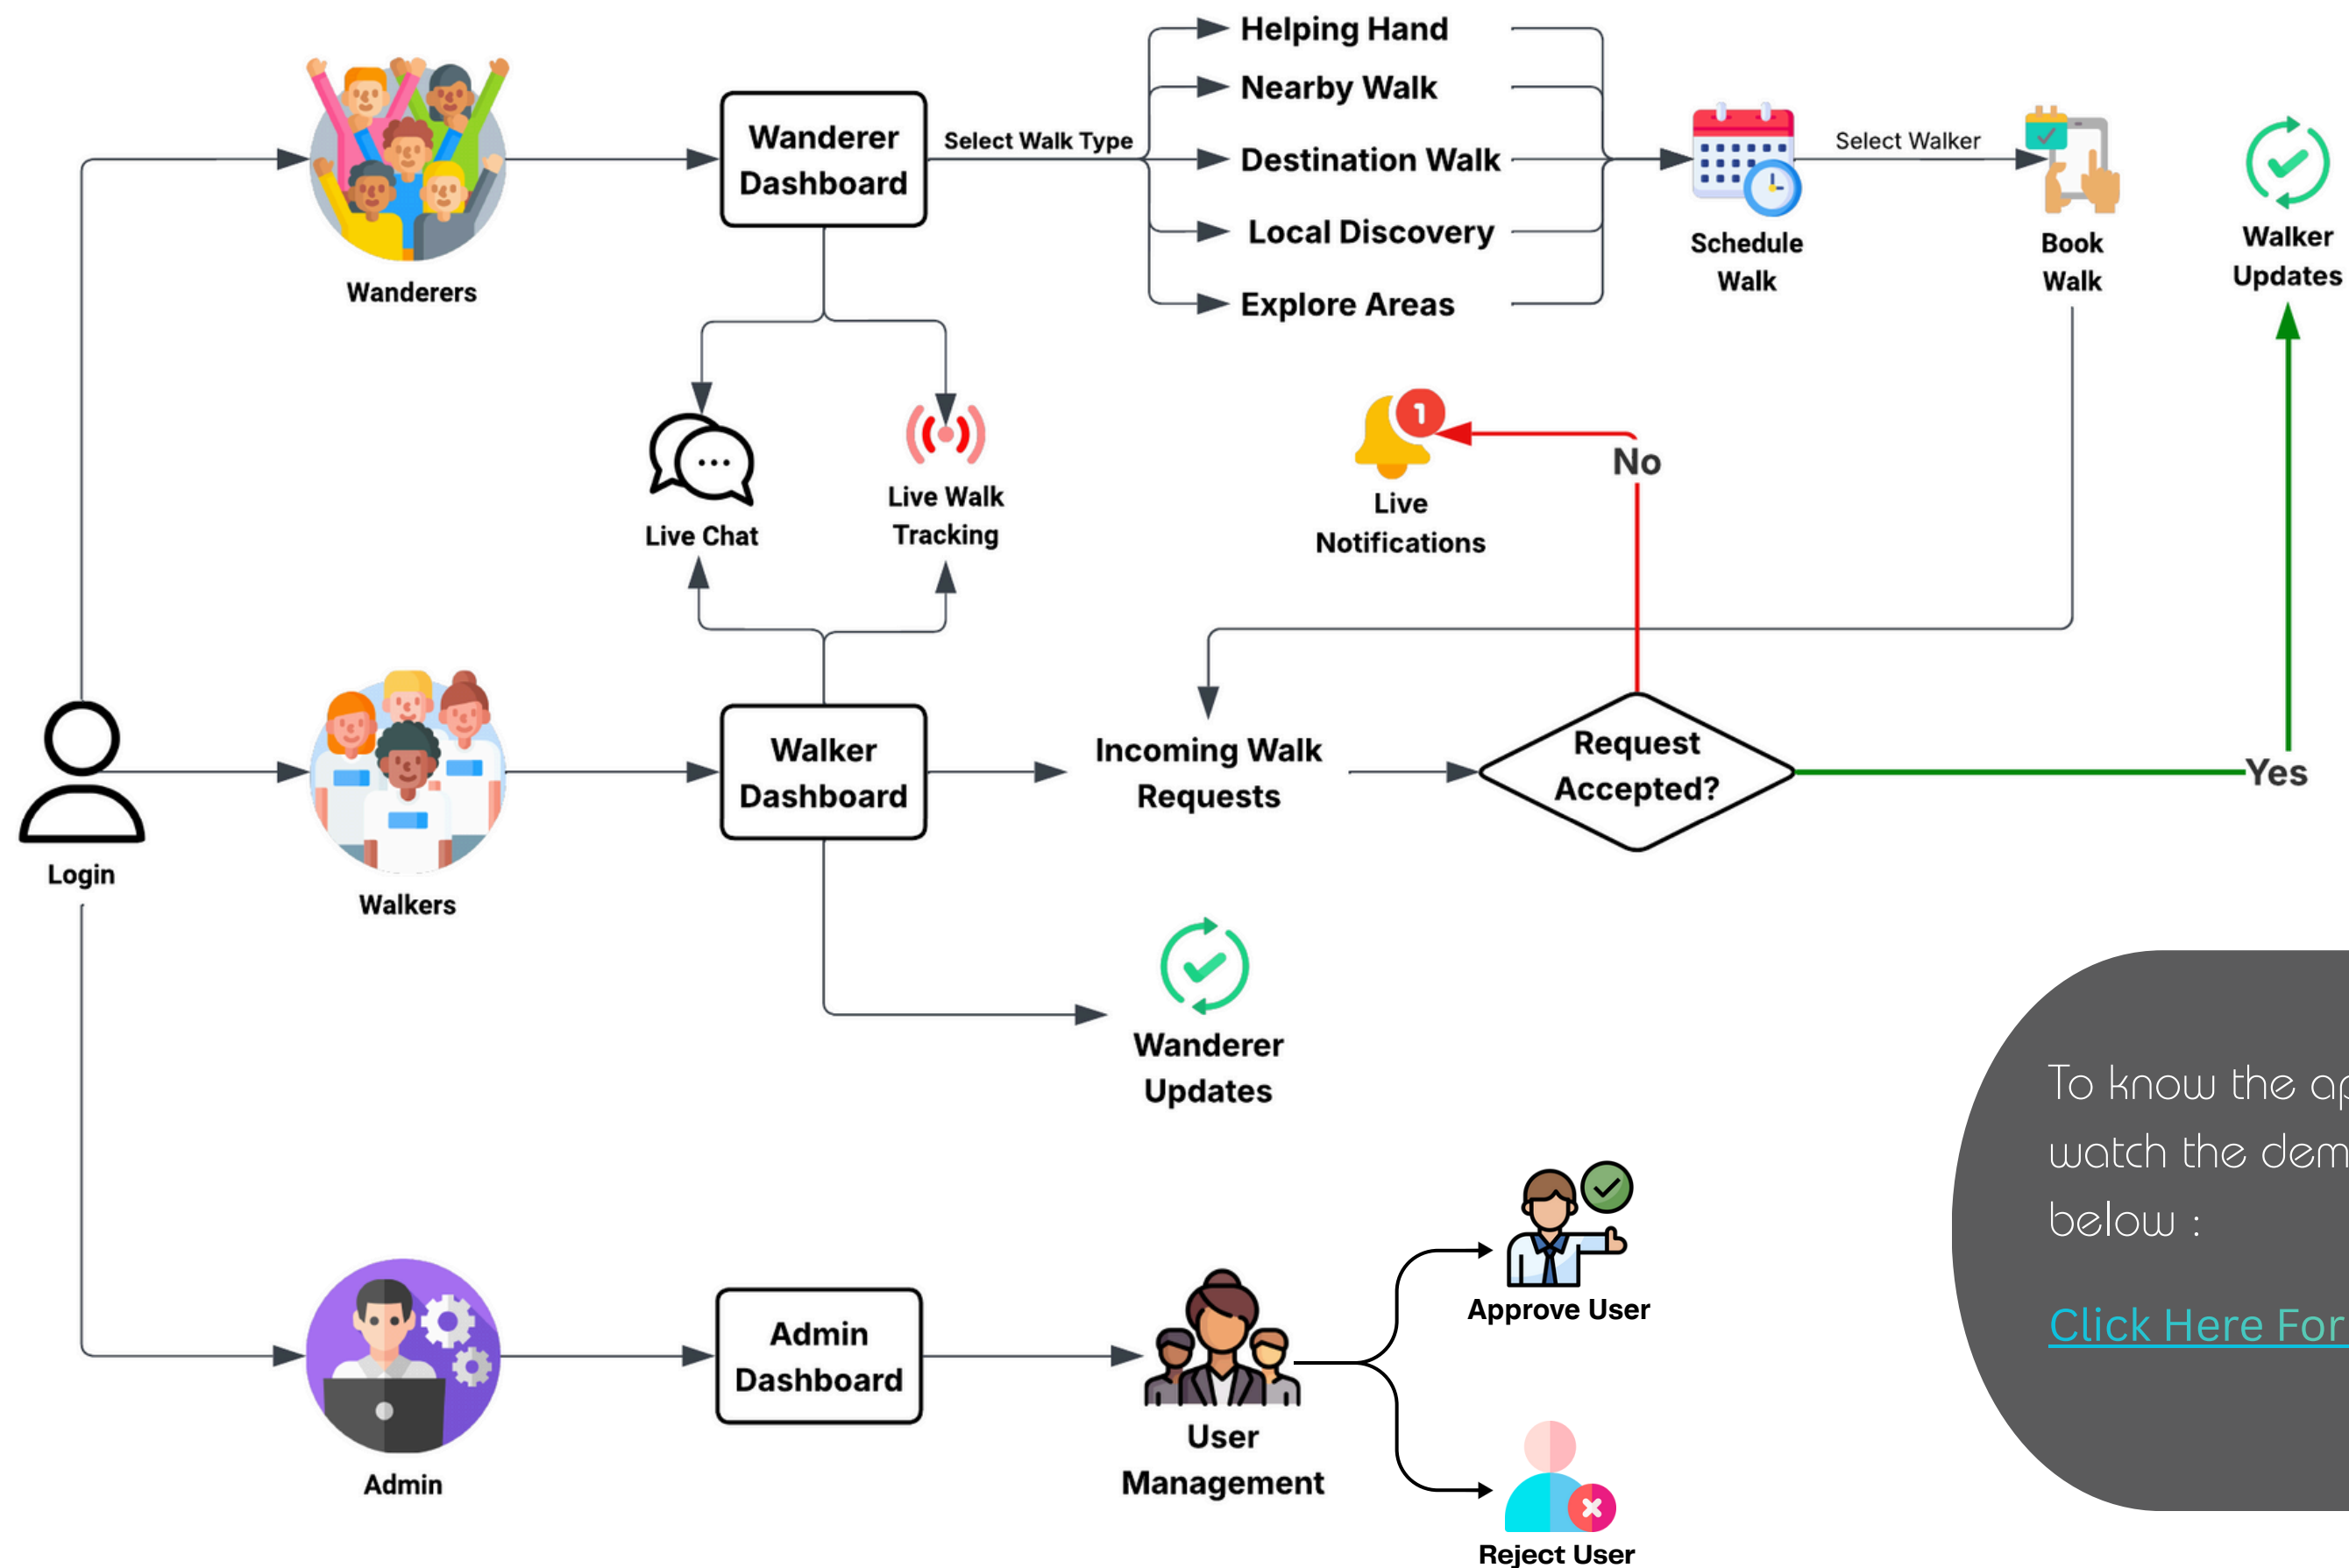

6. Admin Oversight

- Manage users, verify Walkers.
- Track payments and earnings.
- View analytics and system reports.

FLOWCHART OF APP FLOW

To know the app idea in a better way, you may watch the demo video via the link provided below :

[Click Here For MoveMates Demo Video](#)

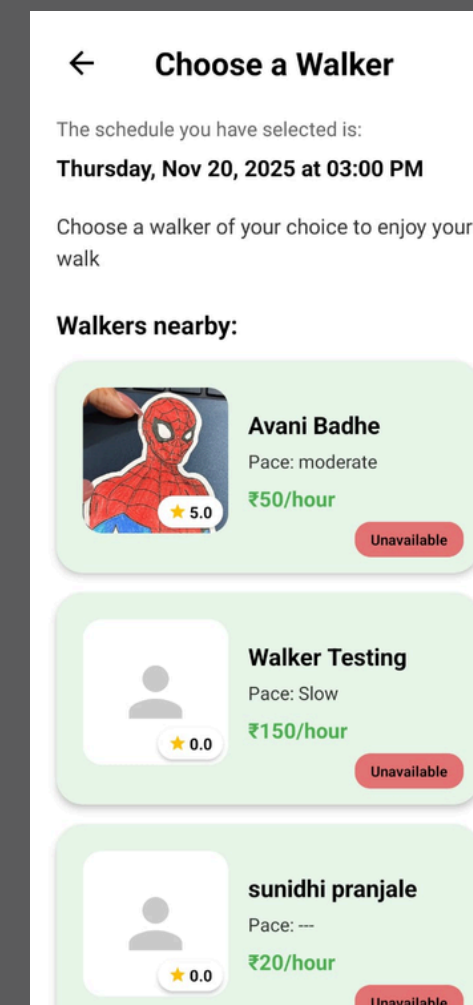

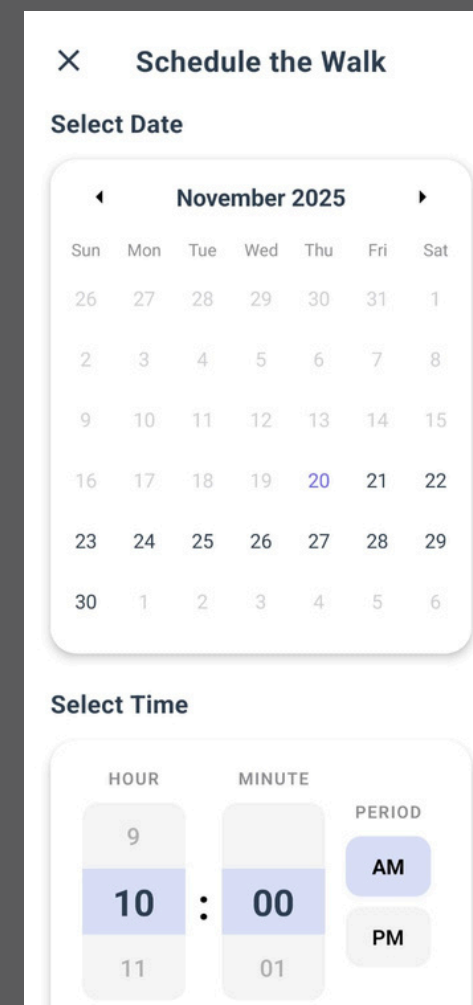

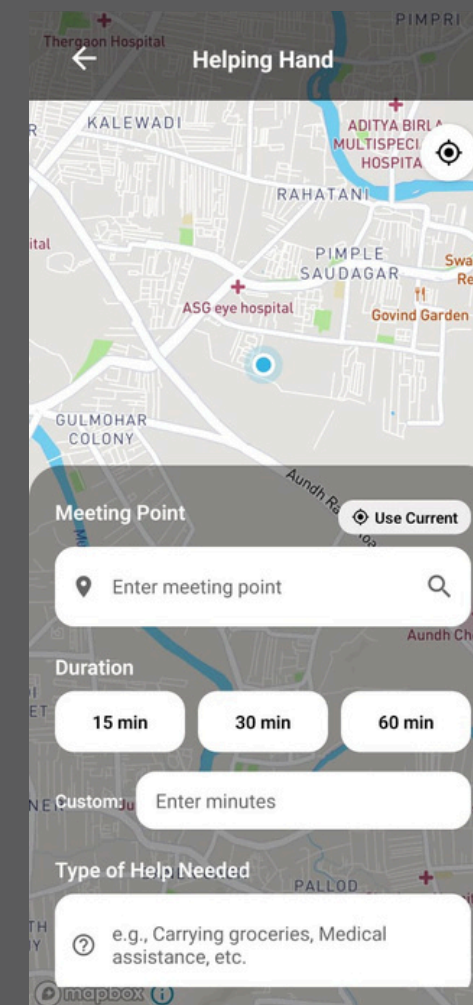

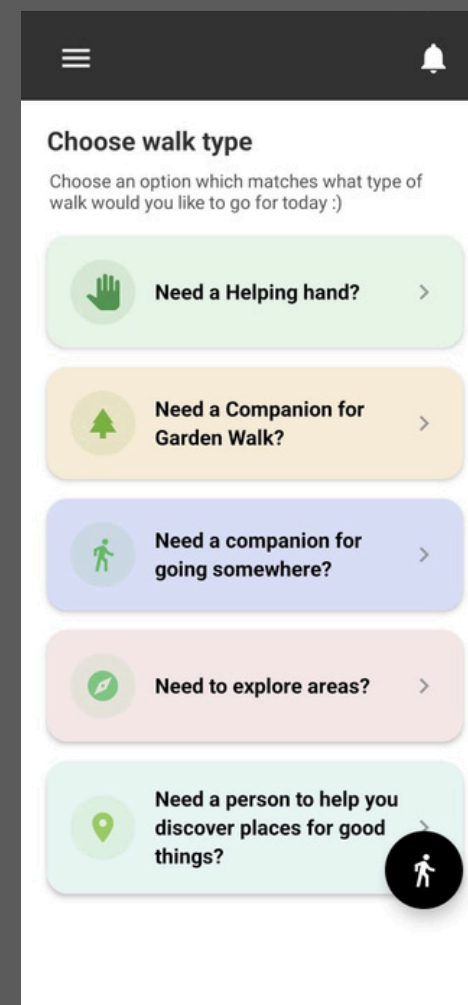

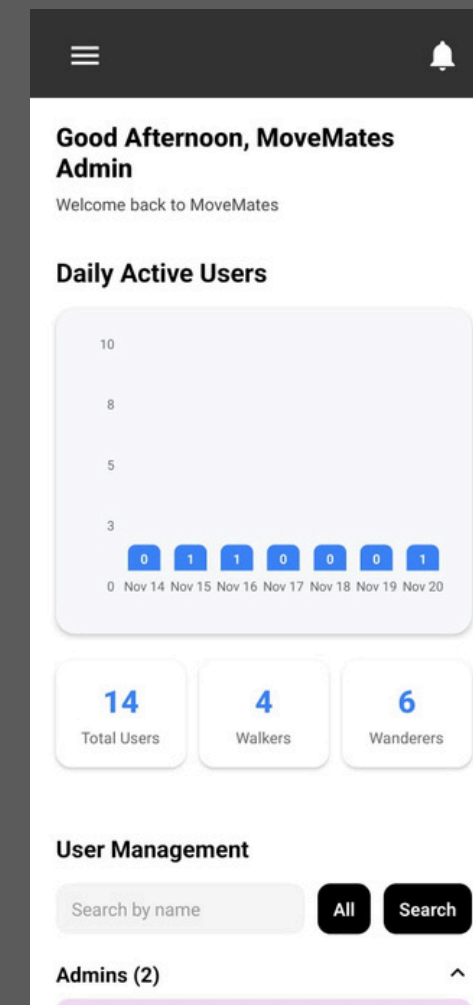

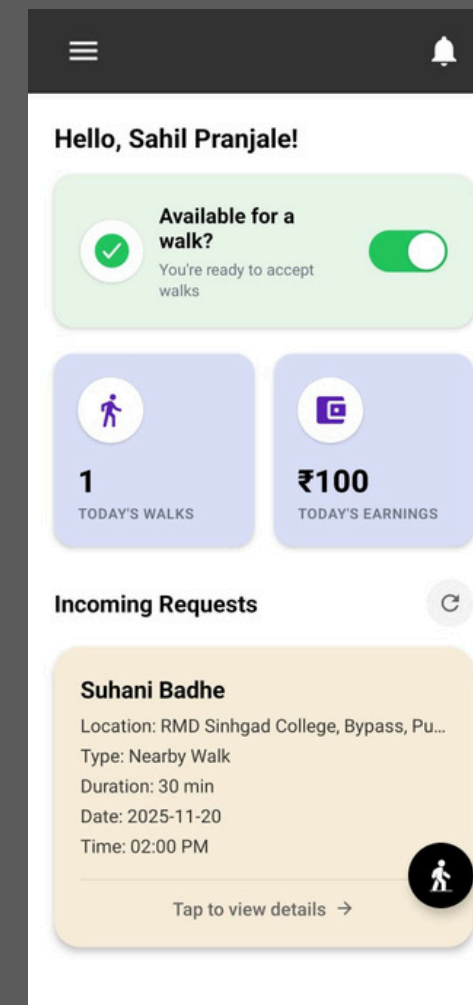

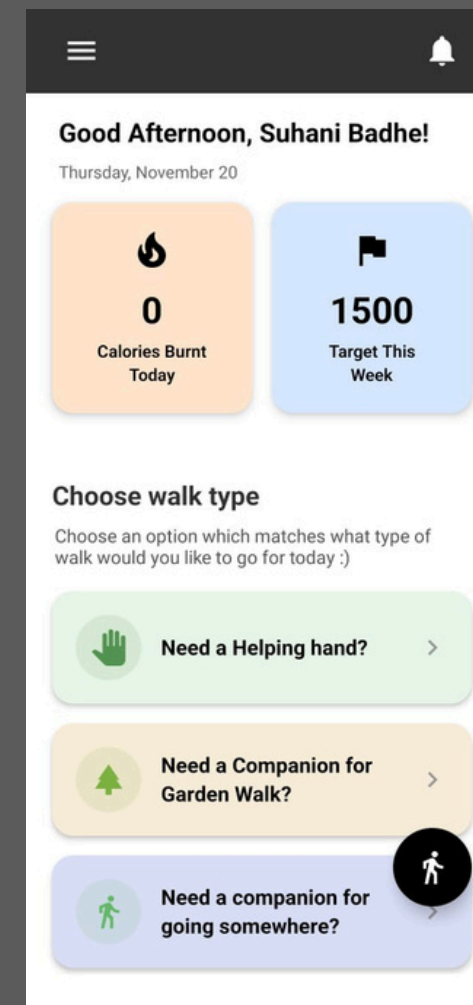

MAIN FEATURES

Multi-User Architecture

- Separate dashboards for Walkers, Wanderers, and Admin.

Customizable Walk Booking

- 5 walk types with detailed preferences.
- Pickup/drop selection with maps.

Verified Walker System

- Government ID check
- Address verification
- Qualification quiz
- Admin approval workflow

Walker Assessment

Let's get to know you better

35 minutes

23 questions

No time limit per question

This assessment helps us understand your approach to various situations you might encounter as a walker. Please answer honestly as your responses will help us match you with compatible walking partners.

FUTURE SCOPE

- i) Intelligent Weather Handling
- ii) Recurring Walk Subscriptions
- iii) Health Integration & Analytics
- iv) Group Walks & Community Events
- v) Specialized Assistance Services
- vi) Geo-Fencing Safety Zones
- vii) Wheelchair Assistive Mode
- viii) Route Recording & Replay
- ix) Skill Badges & Streak Rewards

NOVEL ASPECTS

- First-of-its-kind “Walking Companion as a Service” model.
- End-to-end verification system ensuring trust and safety of Walkers.
- Real-time GPS-based walk monitoring with safety layer.
- Highly personalized walk customization (speed, purpose, language, pet walk, etc.).
- Dual-database architecture (Firestore + RealTime DataBase) for optimized performance ; instant reads + real-time tracking.
- Integrated monthly earning system for Walkers with automated commission calculation.
- Focus on mobility + companionship, not transportation ; bridging a novel gap in accessibility services.

Thank You
